Canada

Trade-marks Journal

Vol. 65 No. 3338

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

(1) Chemical products for research, industry and science, namely media for bacteriological culture, buffer solutions; chemicals, namely media for bacteriological culture, diagnostic reagents for in vitro use in the fields of biochemistry, clinical chemistry, molecular biology and microbiology for research and for scientific purposes, for the control, detection, diagnostic and analysis of contaminants in industrial, agricultural, cosmetic, agri-food, veterinary and pharmaceutical products, as well as for the environment.

(2) Buffer media for bacteriological culture, diagnostic reagents for in vitro use in the fields of biochemistry, clinical chemistry, molecular biology and microbiology, for medical, pharmaceutical and veterinary use for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in medical, veterinary, and pharmaceutical products.

(3) Buffer media for bacteriological culture, diagnostic reagents for in vitro use in the fields of biochemistry, clinical chemistry, molecular biology and microbiology, for medical, pharmaceutical and veterinary use for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in medical, veterinary, and pharmaceutical products.

(4) Scientific apparatus and instruments, other than for medical use, namely laboratory instruments for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in industrial, agricultural, agri-food, cosmetic, veterinary and pharmaceutical products, and in the environment, in vitro test kits for identifying microorganisms, urine test strips, blood test strips, blank cassettes, scientific apparatus and instruments, other than for medical use, in the nature of incubators for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in industrial, agricultural, agri-food, cosmetic, veterinary and pharmaceutical products, and in the environment, apparatus and instruments, other than for medical use, for recognizing and reading Petri dishes, namely magnetic object detectors, optical character readers and Petri dish sorters, computer software for diagnostic and laboratory apparatus, namely computer software providing interconnectivity between laboratory instruments, software enabling the processing and interpretation of diagnostic testing results designed for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in industrial, agricultural, agri-food, cosmetic, veterinary and pharmaceutical products, and in the environment, software enabling the connection between laboratory instruments, computer software for the collection, storage and processing of information in the field of in vitro diagnosis, of images,

of photographs, audio, visual and audiovisual data, all of the aforesaid goods exclusively in the fields of in-vitro diagnostics and theranostics for scientific research, none of the aforesaid goods being for forensic science.

(5) Apparatus and instruments for medical, pharmaceutical and veterinary use, namely in vitro testing kits for identifying microorganisms, urine test strips, blood test strips and blank cassettes, scientific apparatus and instruments for medical use, namely medical image processors and machines for recognizing test samples, namely body fluid samples, cell samples, biological tissue samples, organ samples for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants from clinical samples, namely body fluid samples, cell samples, biological tissue samples, organ samples, scientific apparatus and instruments for medical use, in the nature of incubators for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants from clinical specimens, namely blood samples, urine samples, apparatus and instruments for medical use for recognizing and reading Petri dishes, namely magnetic object detectors, optical character readers, Petri dish sorters, diagnostic apparatus and instruments for medical use, namely laboratory instruments for the control, detection, diagnostic, identification, and analysis of microorganisms and contaminants in medical, veterinary, and pharmaceutical products, all of the aforesaid goods being in the fields of in vitro diagnosis and theranostics.

SERVICES

(1) Computer processing and composition, namely compilation and systemization of data and technical documents in computer databases; updating and correcting information, images, photographs, audio, visual and audiovisual data in the field of in vitro diagnosis.

(2) Interconnection services between data banks of various laboratory instruments for the transfer of data, images, photographs, messages, audio, visual and audiovisual data; all such services being for the in vitro diagnosis and theranostics fields.

Software applications for interconnecting electronic devices; Software applications for managing multiple electronic devices; Software applications for monitoring multiple electronic devices; Software applications for controlling multiple electronic devices; Software applications for enabling multiple electronic devices to communicate with one another; Computer network servers; Computer servers; Microchips; Computer peripheral devices, namely, computer cursor control devices, computer keyboards; circuit boards, namely, stand-alone general purpose micro controller boards used for calculation and interfacing with low voltage electronic components; electromechanical components, namely, audio speakers, electric relays, microphones; personal computers; modems; wireless devices, namely, audio sensors, electric actuators, blank near field communication tags, near field communication technology-enabled readers, electronic readers and controllers for controlling access to a premises wireless transmitters and receivers, and remote control transceivers; circuit boards; network connectivity sensors, namely, sensor cards for detecting network connectivity; electronic sensors for sensing motion, pressure, light, sound, and power; wireless telecommunications switches, namely, electronic switches for audio, visual, haptic and motion signals; electronic controllers, namely, electronic control systems for interactive devices excluding gaming devices; electronic controllers for use with motors, fans, buzzers, lights, and speakers; receiver of electronic and electric signals; transmitter of electronic, electric and network signals; electrical, electronic and network connectivity components, assemblies and subassemblies in the nature of connectable and de-connectable modules comprised primarily of batteries, power supplies, electrical wires, inverters, control buttons, switches, timing sensors, pressure sensors, temperature sensors, proximity sensors, alarm sensors, light sensors, transmitters, and receivers; electrical, electronic and network connectivity components in the nature of switches, control triggers, input sources in the nature of switch, button, and proximity triggers, microphones, oscillators, light dimmers, indicator lights, and signal processors; experimental apparatus and equipment used for teaching the principles of electricity, electronics, interaction, physics, logics, circuitry and network connectivity, namely, electric and electronic integrated circuit modules for building interactive devices, and electronic control circuit modules for use in experimentation and testing; mobile application software for use in accessing, controlling and managing objects connected to wireless telecommunication networks; mobile application software for controlling, receiving, transmitting and recording feedback and data from circuit modules; mobile application software for control and monitoring for use with objects embedded with electronics, software, sensors and network connectivity devices; electrical and electronic connections and clip-on electronic display boards, electronic display screens, power supply modules; electric relays, and electronic circuits; plug-in electronic construction electronic display boards, electronic display screens, power supply modules and printed circuit boards and integral component parts thereof; electrical, and mechanical measurement, control and regulation apparatus and instruments, namely, voltage, current, force, pressure, and power measuring instruments; power supply apparatus and instruments, namely, alternating current power supplies, direct current power supplies, switch mode power supplies, electric power analysers, electric power regulators, uninterruptable power supplies; voltage/current and current/voltage converters; power strips for terminals, plug and socket connectors, and clip-on electronic display boards, electronic display screens, power supply modules, and electric light dimmer modules, all being parts of terminals for electronic display modules, power supply modules; mounting rails, electric test plugs, electric sockets, connectors clamps, all being parts and fittings for computer terminals or universal serial bus dongles being wireless network adaptors, peripheral component hardware interface terminal components; computer hardware; computer apparatus, namely, universal serial bus dongles being wireless network adaptors, peripheral component hardware interface; computer memory modules; computer sub-assemblies, namely, interface circuits for video cameras; portable computers; components for computers, namely, display boards, electronic display screens, video display cards, computer keyboards, multifunction keyboards, input devices for computer hardware namely, track ball input devices, mouse pointer devices, track pads, biometric identification apparatus; printed circuit boards; computer circuit boards; memory boards; computer chips; integrated circuit chips for timing sensors, pressure sensors, temperature sensors, proximity sensors, light sensors, alarm sensors, electric actuators, gateway routers in the nature of computer control hardware, wireless routers, network routers, network adapters, network switches; data storage apparatus equipment, namely, network attached digital data storage devices, universal serial bus digital data storage devices, semi-conductor memories, computer memory devices, computer memory modules, memory expansion cards; computer memory devices; computer memory hardware; memory cards; computer motherboards; computer peripheral interface cards for data processing equipment in the form of printed circuits; electric switches, transceivers and converters; computer cables; electrical cables; data transmission computer cables; power supplies; power adapters; power protection devices, namely, electrical surge arrestors, voltage surge suppressors, surge protectors, electric relays; electric couplings; computer serial ports; computer software for use with home and office electrical power automation systems for electrical power monitoring and controlling appliances, lighting, HVAC, and security devices; computer operating software; computer application software for mobile phones, portable media players, handheld computers, for monitoring and controlling computers, home appliances, switches, timing sensors, pressure sensors, temperature sensors, proximity sensors, light sensors, and alarm sensors; computer programs monitoring and controlling computer devices, switches, timing sensors, pressure sensors, temperature sensors, proximity sensors, and light sensors; computer monitors; keyboards; computer pointer devices, namely, track ball input devices, mouse pointer devices, and mouse pads; document printers; computer video and picture projectors; headsets and audio speakers both for use with computers; wireless transmitters; wireless computer peripherals, namely, computer cursor control devices, computer keyboards; networking devices, namely, gateway routers in the nature of computer control hardware, wireless routers, network routers, computer network adapters, computer network switches, and computer network interface devices; sound recording devices; image recording devices, namely digital cameras and video cameras; sound and video signal transmission devices; sound and video replay devices; Apparatus for use in remote control of fire places, televisions, recorded digital data media players, video display devices, remotely controlled lights, air conditioners, alarm systems, electric locks, electronic locks, radio frequency controlled locks, and garage doors; electric installations for the remote control of industrial machinery; Infrared remote control apparatus, control of fire places, televisions, recorded digital data media players, video display devices, remotely controlled lights, air conditioners, alarm systems, electric locks, electronic locks, radio frequency controlled locks, garage doors, namely infrared blasters and infrared transmitters; Infrared remote controllers for use with fire places, television, recorded digital data media players, video display devices, remotely controlled lights, air conditioners, alarm systems, electric locks, electronic locks, radio frequency controlled locks, and garage doors; radio remote control apparatus, namely radio transmitters and receivers for remote control and electronic key fobs being remote control apparatus; remote controls for cameras; remote controls for lighting units; remote controls for sound reproduction apparatus; electric or electronic remote control apparatus for use with televisions; electric or electronic remote controls for use with video recorders; electric or electronic remote control devices for industrial machinery, namely, electronic apparatus for the remote control of industrial machinery; electric or electronic remote control devices for the closing of windows; electric or electronic remote control devices for the opening of windows; electric or electronic remote control devices for locking doors, gates, machinery, hatches, vents, and windows; electric or electronic remote control devices for use with garage doors; electric or electronic remote control devices for use with gates; electric or electronic remote control devices for fireplaces; electric or electronic remote control devices for automatically operating control valves for regulating the flow of gasses and liquids; electric or electronic remote control devices for operating flying objects other than toys; electric or electronic remote control devices for operating vehicle alarms; electric or electronic remote control devices for operating vehicle door locks; electric or electronic remote control devices for operating vehicles other than toy vehicles; electric or electronic remote data measuring apparatus, namely, sensors for sensing pressure, temperature, humidity, light, sound, vibration, movement, altitude, and orientation; remote electric or electronic control stations, namely, access control and alarm monitoring systems, electrical and electronic burglar alarms, personal security alarms that connect to a wireless communications network, environmental monitoring system comprised of meters and sensors that measure pressure, humidity, temperature and includes alarm and reporting functions; remote controls for granting keyless entry to buildings; remote entry point control apparatus, namely, electronic key fobs being remote control apparatus, keypads, and biometric identification determination devices; remote monitoring apparatus, namely, wireless and wired controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems, namely, building control systems, computer server clusters, vehicle tracking devices, energy and utility systems, security systems, lighting systems, air conditioning systems, and hospital data management systems; remote data and signal processing monitors, namely, wireless and wired controllers to remotely monitor and control the function and status of other electrical, electronic, and mechanical devices or systems, namely, building control systems, computer server clusters, vehicle tracking devices, energy and utility systems, security systems, lighting systems, air conditioning systems, hospital data management systems; wireless controllers to remotely read the status of fluid level indicators; wireless communication devices for voice, data or image transmission, namely, wireless transmission apparatus for remote controlling building control systems, computer server clusters, vehicle tracking devices, energy and utility systems, security systems, lighting systems, air conditioning systems, and hospital data management systems; programmable remote control devices for fire places, televisions, recorded digital data media players, video display devices, remotely controlled lights, air conditioners, alarm systems, electric locks, electronic locks, radio frequency controlled locks, and garage doors; apparatus for communication, namely, mobile phones, mobile remote controls for communications between remote controllers, two-way radios, wireless computer peripherals, and wireless remote temperature and humidity monitors for building maintenance; apparatus for data communications between computers, namely, modems, gateway routers in the nature of computer control hardware, wireless routers, network routers, computer network adapters, computer network switches, and computer network switches; apparatus for the communication of data, namely, modems, gateway routers in the nature of computer control hardware, wireless routers, network routers, network adapters, network switches, computer network switches; apparatus for use in digital communication transmission, namely, wireless communication devices for data transmission; communication apparatus, namely, apparatus for transmission of communication using near field communications and radio frequency communications; communication devices, namely, wireless communication devices for transmitting images taken by a camera, wireless communications devices for transmitting and receiving data from and to timing sensors, pressure sensors, temperature sensors, proximity sensors, light sensors, and alarm sensors; communications devices, namely, wireless communication devices for voice, data or image transmission; telecommunication modems; antennae for wireless communications apparatus; data communications hardware, namely, telecommunications and data networking hardware, namely, devices for transporting and aggregating voice, data, and video communications across multiple network infrastructures, communications protocols, and near field communications chips
